

## Bioanalytical services

Fidelta has extensive capability, expertise and experience in the field of bioanalysis providing contract bioanalytical services including non-GLP and GLP quantitative analysis in support of discovery and preclinical development activities, clinical study samples, as well as biomarker and qualitative analysis.

Rapid turnaround quantitative analysis is ensured through efficient sample preparation, state-of-the art LC-MS/MS systems, experienced and trained scientists and a dedicated instrument maintenance team.

Our independent quality management (QM) group ensures adherence to analytical methods, standard operating procedures (SOPs) and GLP regulatory obligations and guidelines. All studies are performed in-line with SOPs and guidelines, as well as EMA and FDA bioanalytical guidelines.

### HIGH-THROUGHPUT BIOANALYSIS

- supported through DiscoveryQuant, a state of the art plugin that enables batch based compound optimization and rapid method and batch creation, including results review and reporting

### NON-GLP QUANTITATIVE & QUALITATIVE ANALYSIS

- PK, PD and Toxicology studies
- Metabolite Identification and profiling
- Reactive metabolite screening

### GLP BIOANALYSIS

- In support of preclinical development including:
  - Method development
  - Method validation
  - Method transfer
  - Cross validation
  - Sample analysis

### BIOMARKER ANALYSIS

- **State-of-the art technologies**
- **Rapid sample turnaround**
- **High quality data**
- **Dedicated bioanalytical team**
